

# URVIL PANCHAL

Ahmedabad | 9016760721 | urvilpanchal13@gmail.com | LinkedIn | Github | Portfolio

## Work Experience

### Junior AI Developer @ Eternal Web PVT. LTD.

Apr 2025 - Present

- Hosted the open-source LLM (**Llama-3.2-11b**) locally using **Ollama**.
- Created a MCP server and connect it with clients like Claude Desktop and Cursor IDE.
- Developed the Backend services for mobile application using **FastAPI**.

### DATA SCIENCE TRAINEE @ NEXUSLINK SERVICES PVT. LTD.

Jun 2024 – Jan 2025

- Developed an end-to-end object detection system using the yolo-v8, with deployment on **RunPod** serverless.
- Built a **RAG** system leveraging large language models (LLMs) for enhanced information retrieval. Created and deployed scalable APIs using **FastAPI** and containerized applications with **Docker**.
- Managed cloud infrastructure and deployments on **AWS**, optimizing for performance and cost, while handling version control and code management through **GitHub** to streamline team collaboration.

## Skills

**Programming Languages:** Python

**Core Competencies:** Deep Learning, Computer Vision, Natural Language Processing, Machine Learning

**AI/ML Frameworks:** PyTorch, TensorFlow, Langchain, Scikit-Learn

**Tools & Platforms:** Git, Github, Docker, Amazon Web Services (AWS)

**Additional Skills:** Flask, Streamlit, FastAPI, LLM Fine-tuning, Ollama, Transformers, RAG Techniques

## Projects

### MCP Powered Chatbot

- Developed an MCP Server for a local SQL database and weather api.
- Connected the MCP server with clients applications like Claude Desktop and Cursor IDE.
- Created a separate custom client using **mcp-use**, facilitating robust client-server communication and seamless data exchange.

### Fine-Tuned DeepSeek-R1 on Bhagwad\_Geeta | [Github](#)

- Fine-tuned **DeepSeek-R1-Distil-Qwen-1.5B** on the Bhagwad Geeta using **LoRA**, optimizing for efficient adaptation with low-rank updates using parameter-efficient fine-tuning (**PEFT**) technique.
- Leveraged PEFT techniques to reduce memory usage while maintaining model performance.
- Developed a Streamlit-based chat UI, enabling interactive conversations.

### NSFW Detection System

- Trained a **YOLOv8** object detection model to detect explicit content by identifying adult imagery. Data was manually annotated to ensure high accuracy.
- Created a **Docker** application for the detection system, enabling seamless integration and scalability.
- Hosted the system on **RunPod**, providing efficient and scalable cloud-based detection for NSFW content.

### LLM-Powered Document Q&A System | [Medium article](#)

- Developed a **Retrieval-Augmented Generation (RAG)** application that accepts text and PDF files as inputs, and let users to ask questions and get responses based on the content of the files.
- Used **Llama 3.1-70B** as the Large Language Model (LLM) with **Groq API**, and **Qdrant Vector Store** for efficient data storage and document retrieval.
- Used **Langchain** as the framework to seamlessly integrate the LLM, document retrieval, and user interaction for an interactive Q&A experience.

### Object Detection Using Detection Transformer

- Annotated over **8,000 doors** in floor-plan images for object detection
- Trained **Facebook's DeTr** model on custom annotated data to detect doors in floor plans.
- Developed and deployed the model in a **Docker image** for scalable use.

## Education

B.E in Information Technology • Gujarat Technological University

2020-2024
